FIELD SWITCH

The Field Switch comprises of following major components:

- HT VCB, HT Isolator, PT & CT.
- Protective Relays such as Motor Protection, Instantaneous Over Current and Short Circuit, Under Voltage, Earth Fault/leakage, Negative Phase Sequence etc.

Salient Features:

- The system is designed for 3.3, 6.6 or 11 KV.
- Power can be connected through cable couplers/cable boxes for incoming and out going.
- It is mounted on skids for frequent shifting by pulling the system in mine area.

Typical equipments/machines which can be powered by the field switch are- Drag Line, Rope/Marian Shovel, Over Burden Drill, Excavator and other heavy earth moving machines.

Any other variation can be tailored as per buyer's need.
